NEW TECH TALENT / FUTURE LEADERS

Leading with AI

Your people are already using AI. Now you need the strategy.

THE CHALLENGE

Everyone's using AI. Nobody is steering it.

54%
of the businesses the British Chambers of Commerce surveyed in 2026 are using AI

71%
of UK employees have used unapproved consumer AI tools at work

17%
of AI-using businesses have any policy or guidelines for it

12%
of managers feel very confident leading teams that use AI

Sources: British Chambers of Commerce, March 2026. Microsoft UK, October 2025. DSIT, UK Business Data Survey 2026. Chartered Management Institute, June 2026.

OUR SOLUTION

Strategy and skills in one: a plan your leadership owns, and managers who can lead with it.

1 DISCOVER

Leadership diagnostic

60 to 90 minutes with you and one or two senior colleagues, at your offices.

YOU LEAVE WITH

A clear picture of where you stand and what to do first.

2 DECIDE

Leading with AI

Two half days for your senior executive team: a briefing on governance, risk and your regulator, then the five decisions that matter.

YOU LEAVE WITH

Your AI strategy and implementation plan, with named owners.

3 DELIVER

AI at Work

Two half days for heads of department and team leaders: what AI can really do with your systems, then putting it to work inside your rules.

THEY LEAVE WITH

The confidence, knowledge and practical experience to apply the strategy.

4 REVIEW

Check it's working

We come back to your senior team and team leaders to check the AI system is working.

YOU LEAVE WITH

An AI strategy in place, set by the leadership team, implemented by your team.

- Consultancy and training in one
- In person, at your premises
- One facilitator throughout
- About two days of senior time over six to eight weeks

Start with a conversation.
